☐ SOP (Title, # and approval
date): _____

Requester: Michael Ritorto, RI Manager

Date: 8/12/2016

Applicable section of SAP/SOP:

SAP Section 4.6: Soil Borings and Soil Sampling

Description of Modification:

Seven (7) additional soil borings to 12 feet below land surface will be completed in the borrow pit area (see attached figures). The borings will be completed utilizing the sonic rig. Soil samples will be collected from each boring from three intervals including 0 to 0.5 ft-bls, 2 to 4 ft-bls, and 10 to 12 ft-bls. Soil samples will be analyzed for the following parameters:

- TCL VOCs (excluding surface soil samples)
- TCL SVOCs
- TAL Metals
- TCL PCBs
- TCL Pesticides (surface samples only)
- Total Cyanide: and
- Fluoride

Rationale for Modifications / Potential Implications of Modifications:

The additional soil borings are proposed to be completed in August 2016 as part of the ongoing Phase I Site Characterization drilling program, before the sonic drill rig is demobilized from the site. Soil analytical data from the added borings will be added to the overall Phase I Site Characterization dataset and will be utilized to initially evaluate conditions within the borrow pit area.

Duration of Modification (Check one):

☒

Temporary

Date(s) 8/12/2016

Sample Numbers CFSB-134 through CFSB-140

☐

Permanent (Proposed Text Modification Section)

Effective Date: _____

DATA QUALITY INDICATOR DEFINITIONS

Reject – Samples associated with this modification form are not useable. The conditions outlined in the modification form adversely affect the associated sample to such a degree that the data are not reliable.

Low Bias – Samples associated with this modification form are useable, but results are likely to be biased low. The conditions outlined in the modification form suggest that associated sample data are reliable, but estimated low.

Estimate – Samples associated with this modification form are useable, but results should be considered approximations. The conditions outlined in the modification form suggest that associated sample data are reliable, but estimates.

High Bias – Samples associated with this modification form are useable, but results are likely to be biased high. The conditions outlined in the modification form suggest that associated sample data are reliable, but estimated high.

No Bias – Samples associated with this modification form are useable as reported. The conditions outlined in the modification form suggest that associated sample data are reliable as reported.
